Emily Schmid  
Registration Division  
Herbicide Branch

**Subject: Submission of a revised master label for XtendiMax® With  
VaporGrip® Technology (Alternate Brand Name: M1768 Herbicide)  
registration, EPA Reg. No. 264-1210**

Dear Emily Schmid,

On November 2, 2020 U.S. EPA notified Bayer US – Crop Science (Bayer) they intended dicamba user training to occur on an annual basis rather than every other year, as was indicated on the previously approved XtendiMax® With VaporGrip® Technology master label (EPA Reg. No. 264-1210). To reflect that change, Bayer herein submits a revised master label for XtendiMax® With VaporGrip® Technology.

Additionally, Bayer is requesting EPA to correct a typographical error regarding the registration expiration date on page 2 of the Terms and Conditions for XtendiMax® With VaporGrip® Technology (264-1210). It currently indicates the expiration date is December 20, 2020 and needs to be corrected to December 20, 2025.

This application is being submitted electronically and contains the following:

- This cover letter
- Application for Pesticide Registration – EPA Form 8570-1
- Revised XtendiMax® With VaporGrip® Technology master label (264-1210)

Should you require any additional information or have any questions or concerns regarding this submission, please contact me (contact information at right) or George Sabbagh in our Washington D.C. office at (913) 231-6291 or [george.sabbagh@bayer.com](mailto:george.sabbagh@bayer.com).
